## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 29, 2007 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Election/Restrictions***

3. Claims 1-22 and 29-31 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 31, 2005.

### ***Claim Rejections - 35 USC § 102***

4. Claims 23-25, 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Proffit (3,776,464).

Proffit discloses a nozzle comprising:

- a wall 28;
- a first water deflector comprising:
  - a plurality of apertures 54;
  - a second water deflector 58.

5. Claims 23-25, 27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Genbauffs (3,780,954).

Genbauffs discloses a nozzle comprising:

- a wall 27;
- a first water deflector comprising:
  - a plurality of apertures 43';
  - a second water deflector 47.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Proffit (3,776,464) or Genbauffs (3,780,954).

Proffit and Genbauffs disclose the limitations of the claimed invention with the exception of the upper aperture being larger than the middle aperture which is larger than the lower aperture. Aperture size is knowledge within one of ordinary skill in the

art. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have made the upper aperture larger than the middle aperture which is larger than the lower aperture in the device of Proffit or Genbauffs for flow pattern and distribution.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 23-28 have been considered but are moot in view of the new ground(s) of rejection.
